Product Overview

The CK1000-2T1F series is a 100M Unmanaged (DIN-Rail) Industrial Ethernet Optical Fiber Transceiver, supporting 1*100MBase-X optical interface+2*10/100MBase-T self-adaptive RJ45 ports. The products also adopt with fan-free, low power consumption design, IP40 protection, a corrugated high-strength metal shell, which can enhanced stability of working performance. The product adheres to CE, FCC, and RoHS standards. -40~85 °C operating temperature range enable to withstand harsh working environments. DIN-Rail installations, which can meet the requirements of various industrial settings, make it an ideal solution for quickly and reliably connecting users' Ethernet devices. The equipment can be widely used in various broadband data transmission fields, such as intelligent buildings, smart cities, smart communities, intelligent transportation, telecommunications, security, financial securities, customs, shipping, electricity, water conservancy, and oilfields.
